

Does PlaceMux solve a real problem?

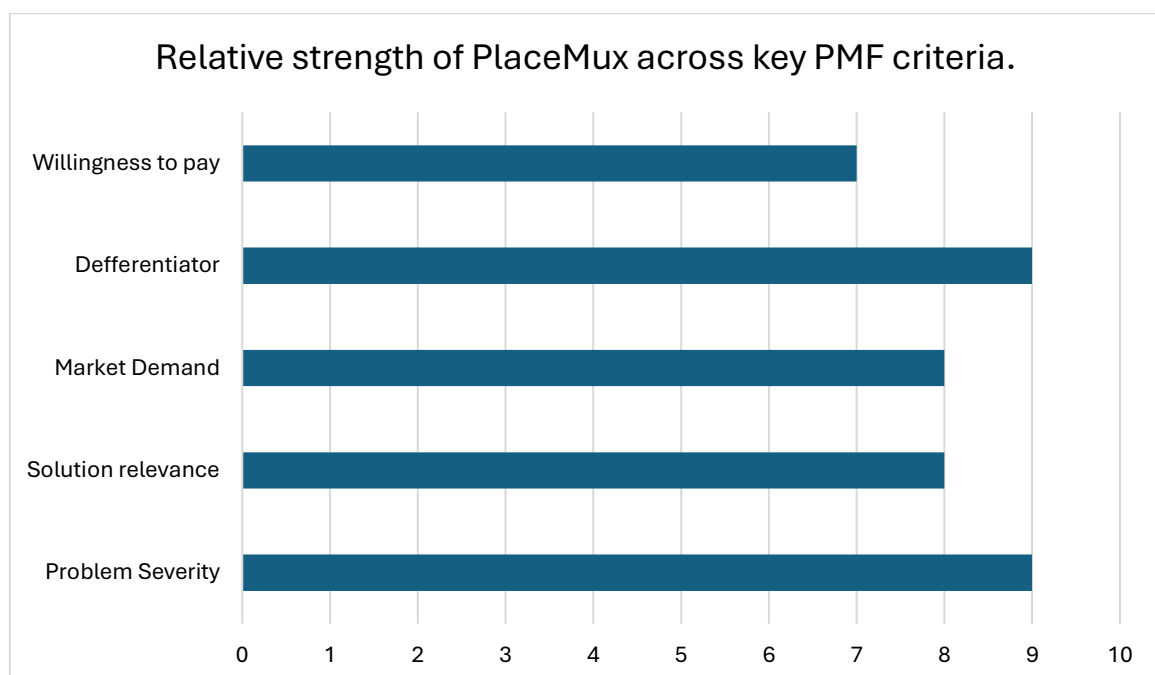

Customer Problem	Existing Gap	PlaceMux Solution
Resume overload	ATS filtering is inefficient	L1-L100 skill scoring
Poor candidate quality	Resume doesn't reflect skills	Standardized assessments
Slow campus hiring	Manual Screening	Automated shortlisting
Skill verification	No objective benchmark	Skill-based ranking

Customer: Mid-size IT companies

Problem: Too many resumes, poor candidate quality, high screening effort

Solution: Objective skill scoring and automated matching

Value: Reduced time-to-hire and improved hiring accuracy

[Scores are qualitative estimates based on secondary market research.]
